## HPT

HPT is a fire and blast rated flexible seal. We can offer a range of products for several applications. HPT is made of a rough and durable material designed for offshore environments, connecting modules and maintaining fireproof partitioning. We design and offers a solution that fullfils your requirements.

The HPT system is offered as a pipe penetration seal. This seal closes the pipe penetration and allows movements of the pipe during operation. The seal can be delivered in a variety of sizes, shapes and fire classes. It is easy to install on bulkheads and decks, single and double sided on exposed and on unexposed side. The HPT is also delivered as vessel seal, conductor seal, linear seal, hang-off protection, equipment protection and lifeboat tunnel seal.

### APPLICATION

- ▶ Quick and easy installation
- ▶ Easy inspection of equipment
- ▶ Weather barrier
- ▶ Fire and blast barrier
- ▶ Closes open spaces and gaps
- ▶ Tailor made in any shape and sizes
- ▶ Wrap around solution
- ▶ Individual tagged according to requirements

- ▶ Jet-fire resistant up to 2 hrs.
- ▶ H-fire approved according to IMO A754 (18)
- ▶ Blast up to 1,25 bars
- ▶ Resistant to hydrocarbon splash, Ozon and UV-light
- ▶ Good weather properties
- ▶ Operating temperature range -40 °C to 90°C
- ▶ Cost efficient
- ▶ Negligible combustion products
- ▶ Maintenance free
